

OpenTech Systems Announces DASD Full Volume Backup Time and Resource Savings and z/OS 1.10 EAV Support

Lewisville, TX / September 16, 2008 – OpenTech Systems, Inc., a leading provider of z/OS Disaster Recovery and Storage Management solutions to automate IT processes and ensure Business Continuity for IBM z/OS centric data centers, today announced a new release of its popular DASD Backup Supervisor product (DBS) which supports z/OS 1.10 as well as Extended Address Volumes (EAV).

DBS will also intelligently read DFSS messages and errors encountered during the backup process and depending on the error or message, will allow the backup job to continue thereby eliminating manual intervention and ensuring the backup jobs complete faster.

In addition, the capability to support VSE volumes that are online to z/OS has been added. DBS already supports CDL Linux and VM volumes and VSE volume backup support is an addition. VSE volumes can be backed up and recovered just like z/OS, CDL Linux, and VM volumes.

About DBS

DASD Backup Supervisor automates the Full Volume backup and recovery process by continuously auditing for new, deleted, renamed or off-line volumes and automatically generating the backup and recovery jobs. And, DBS automates data replication technologies such as Flashcopy, SnapShot and TimeFinder. The Volumes may be stacked on high density tape to maximize media utilization or written to multiple drives simultaneously to reduce backup and recovery time.

About OpenTech Systems, Inc.

OpenTech Systems Inc. was founded in 1994 to design, develop and market industry leading software solutions for IBM mainframe centric data centers and is dedicated to excellence in products, service and support. Specializing in Disaster Recovery Assurance and Storage Management solutions for z/OS,

OpenTech Systems and DASD Backup Supervisor are trademarks of OpenTech Systems, Inc. All other trademarks mentioned are the property of their respective owners. For more information regarding OpenTech's software solutions for z/OS, please visit www.opentechsystems.com or contact:
